DETAILED ACTION

This is in response to amendment filed on 7/26/04 in which claims 1-10 and 12-21 are pending. The applicant's amendment has been fully considered therefore this case is in condition for allowance. In addition the pending claims have been renumbered as 1, 11-19, 2-5, 16 and 6-10, respectively.

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The prior arts of record fail to anticipate or render obvious the following recited features: a second modulator coupled to said mapper, said second modulator containing a set of substantially orthogonal bases, the substantially orthogonal bases of the set corresponding in dimension to the available dimension values of the plurality from amongst which said mapper selects the selected dimension value into which the first antipodal signal formed of the first-modulated signal to be mapped, said second modulator for forming a second-modulated signal, the second-modulated signal of a dimension responsive to the selected dimension value into which said mapper maps the portion of the first-modulated signal the second-modulated signal forming bi-orthogonal codes defined by the substantially orthogonal bases that define multiple dimensional modulation as recited in claim 1. De-rotating the second modulated signal and normalizing the indications of the data, once de-rotated during said operation of de-rotating and generating a normalized representations as recited in claims 17 and 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Mui U.S. Patent No 6,690,739 B1 teaches a method for inter-symbol interference compensation.
